ATLANTA -- PRINTED CIRCUIT DESIGN & FAB is undertaking a survey of how printed circuit board designers, design engineers and other layout specialists use and think about various CAD tools.

Results will be published in an upcoming issue of PCD&F. Please be assured that the data collected are revealed only in the aggregate. No individual data will be revealed.

The survey will take about 3 minutes to complete. To participate, click this link: <http://www.surveymonkey.com/s/NC35KK8>

Because this is a survey, not a poll, the audience being surveyed is not selected or controlled. In short, the more responses we receive, the more valid the results will be. So feel free to share this link with other designers.
