## **Intertronics Delivers Polytec PT Epoxy**

Written by Chelsey Drysdale Tuesday, 30 October 2012 14:15 -

Polytec PT thermally conductive epoxies include single and two-part systems designed for heat transfer applications. Applications include chip bonding, heat sink bonding, thermistors, LED assembly and power semiconductor packaging. Thermal conductivity ranges up to 3 W.m-1.K-1. Come in twin packs or as premixed and frozen syringes.
