NXTP M35 printer supports panel sizes of 350 x 300mm. Is based on NXTP M25, but has a wider body for handling medium sized panels. Available in both single and double conveyor specifications; is for production of automotive and tablet panels. Features include vacuum for holding down the stencil during printing and snap-off, an adjustable squeegee angle, a low-impact clamping mechanism, and solder roll control to prevent air bubbles. Alignment accuracy is $\pm 10 \mu m$, suitable for production of parts as small as 0402mm. Features touch-screen operation panel.
