Trade Groups to Host Flame Resistance Workshop

Written by Chelsey Drysdale Monday, 25 February 2013 12:40 -

SAN JOSE – A pair of trade groups will host a workshop on flame resistance requirements for electronics this spring.

Pinfa-NA and the **HDP User Group** are hosting a workshop: Meeting Flame Resistance Requirements for Greener Electronics. The event will take place April 4 here.

Featured speakers and topics include a presentation on **EPA** activities to protect human health and the environment; a talk on California's green chemistry initiative; a standards update by **Intel**

(for

iNemi)

; industry needs by Intel,

Hewlett Packard

Dell

DCII

Alcatel-Lucent

Isola

, and

TE Connectivity

, and an FR engineering plastic producer response by

BASF

PolyOne

and

Teknor Apex

•

Pinfa represents manufacturers and users of non-halogenated phosphorus, inorganic and nitrogen flame retardants. HDPUG is made up of leading OEMs and other electronics supply chain companies.
