MULINO, OR – Sunstone Circuits has released a factory certified add-on that enforces the PWB manufacturer's capabilities interactively inside

t's

Eagl

e PCB Layout tool.

"With the DFM Add-On, Eagle PCB users can now design with more confidence that their PCB will be manufacturable," said Sunstone CEO Terry Heilman in a statement.

The add-on leverages the CadSoft's design rule checking engine with a complement of Sunstone-specific rules. The tool, Sunstone says, will help eliminate errors early in the design process and cut the time to build a design.

The Sunstone add-on is offered as a complimentary service and can be downloaded at sunstone.com/pcb-resources/Downloads.aspx or cadsoft.de/download.htm (in the miscellaneous downloads section).
